Announcement
Effective July 1, 2012

To all our many loyal customers, suppliers and friends, after many years of service to all, my family and I have decided to sell our company to an investor group which will be focused on growing Duray and expanding our overall presence in the market place.

As we move forward, it will be business as usual and I am very confident and excited about our future. I will continue to be completely involved in the business with our new owners. Please feel free to rely on me and our very capable staff for any assistance, as you have over these past many years. We are all looking forward to serving your needs.

Our friend and loyal employee over these past 30 years, Dennis Solit, has decided to retire from Duray. An orderly transition is in place to support our customers and vendors. We wish Dennis well and thank him for his devoted service.

Our new owners, headed by chairman Ron Techter, have vast experience in managing and growing manufacturing companies over a number of years. They are excited about Duray's future and look forward to working with all of you during the transition. There will be no change to our operating procedures. You can continue to rely on the same quality, delivery, and service you have enjoyed over the past 66 years.

I wish to thank you, our family of loyal employees and friends, for all the support you have given me and our company over the passed 66 years. The future is bright thanks to all of you. I'm grateful to have been part of Duray's history.

Sincerely,
Bernard Meyer
