

New Product Announcement

Xeleum Lighting today announced the introduction of its new **Athena Series Stairwell LED Light Fixture**. Specifically designed for use in stairwells that may be unoccupied for long periods of time, it automatically provides 100% light levels only when the space is occupied and dims to a power saving level of approximately 20% when the space is unoccupied. The combined use of occupancy sensors and LED lighting makes possible dramatic reductions in energy consumption, with savings of up to 85% over conventional stairwell fixtures that do not employ these two features.

One of the unique features of this product is the emergency battery back-up system which is built directly into the fixture. Developing this fixture from the ground up allowed us to fully integrate the electronics with the lighting and battery systems, thereby achieving far superior overall performance at a cost significantly less than approaches based upon simply combining existing components.

Additional features include vandal-resistant construction and electroluminescent tape recharge capability. Installation is simplified because the fixture is self-contained, without the need for external sensors. Available in two foot and four foot lengths, the use of LEDs ensure many years of maintenance-free operation without ever having to change a bulb.

The Athena Series Stairwell LED Light Fixture is UL 924 rated, NFPA compliant, FCC certified and in conformance with DOE rulings pertaining to ASHRAE 90.1-2010, Section 9.4.16(g). Input power is 30 watts in full-on mode and 6 watts in dimmed mode.

About Xeleum Lighting

For over 25 years, Xeleum, and its affiliates have been designing and manufacturing lighting and other electronic products for distribution under numerous major national brands, as well as its own brand, through commercial, industrial and residential sales channels. It is an ISO-9001-2008 and ISO 13485 certified manufacturer with its world headquarters located in Mount Kisco, N.Y.

Looking for Representation

Xeleum Lighting is looking for independent representation in several key markets and will be conducting a half hour webinar next week to provide an overview of the company and its products. The webinar will be conducted on Thursday July 25th at 12:00 PM. Reserve your Webinar seat now at: <https://www3.gotomeeting.com/register/322181142>. Please contact Sondra Cooper at sondra.cooper@xeleum.com for more information.
