FOR IMMEDIATE RELEASE

KEYSTONE INTRODUCES SMART DRIVE HID REPLACEMENT LED LAMPS

NORTH WALES, PA: October 7, 2016 – Keystone Technologies has added a SmartDrive lamp to their line of HID Replacement LED Lamps. The new SmartDrive HID LED lamp is designed for both high bay and low bay applications. Its rated lifetime of 50,000+ hours is almost triple the rated lifetime of metal halide lamps.

SmartDrive technology means installers simply plug & play with the existing magnetic ballast. There are no wiring changes required at all. “Energy savings of at least 50% are immediate. Combine those savings with easy installation and impressive lamp life, and it’s a very short leap from HID to LED,” said Ira Greenberg, CEO of Keystone.

In addition, Keystone is offering the best system warranty in the industry. Josh Brown, VP of Distributor Sales, noted, “When Keystone SmartDrive HID replacement LED lamps are installed with Keystone ballasts, we extend the ballast warranty by 3 years. That’s a 5 year total system warranty, which no other manufacturer can match. That’s Light Made Easy.”
