WE-EF Launches New LED Series of Surface Mounted Wallwashers

Warrendale, PA – July 9, 2013 - WE-EF LIGHTING USA, a leading international manufacturer of Performance Exterior Lighting, has launched new FLC122 and FLC142 LED surface mounted wallwashers.

Launched in 2006, the WE-EF FLC100 series of surface mounted wall luminaires is now well-recognized by lighting designers worldwide as an outstanding and versatile product. As a recent addition to the series, the FLC122 and FLC142 LED luminaires offer four types of light distribution – wide, medium, very narrow and very narrow ‘sharp cut-off’ beam – as well as two color temperatures – 3000 K and 4000 K.

The wide and medium beams are ideal for wallwashing illumination while the very narrow and very narrow ‘sharp cut-off’ beams can reach exceptional heights with precision. An optional linear spread lens accessory is available to extend the range of lighting effects.

A luminous flux of 1000 lm for the FLC122 and 3600 lm for the FLC142 can be achieved at 3000 K. Advanced thermal management protects the LEDs while optimizing lumen output. The integral electronic driver is located in a thermally-separated gear box for 'cool' operation and enhanced reliability.

As with all other WE-EF luminaires, the FLC122 and FLC142 both benefit from WE-EF’s engineering expertise in manufacturing lighting products that are easy to install and economical to maintain.

0-10 V dimming is offered as a standard feature.

Both the FLC122 and FLC142 LED luminaires feature an IP55 rating.

Learn more about WE-EF and the FLC122 and FLC142 LED luminaires by visiting www.we-ef.com.
