

2016 DLC Industry Advisory Committee

The DLC is pleased to announce the inaugural members of the DLC Industry Advisory Committee. The DLC continues to grow in its coverage of qualified products through the SSL technical requirements and is developing requirements for networked lighting systems. Education, collaboration and expertise is best enhanced through direct feedback from industry. The Industry Advisory Committee will work to support the mission and strategic direction of the DLC to drive solid state lighting.

Thank you to everyone who participated in the nomination and selection process. As a reminder, the Stakeholder Input Process will continue to be open to all stakeholders and facilitated by the DLC on critical program, policy and category topics.
